2025

Recycling commences at the Lyons, GA facility

2025

To-date, East Jordan Plastics, Inc. has recycled over 200 million pounds of used horticultural containers at our South Haven, MI facility

Serving the horticultural industry for nearly 80 years.

It all started four generations ago when Ken and Shirley Diller founded East Jordan Box and Crate Co. to produce wooden greenhouse flats for bedding plant growers in the Midwest. From those wooden flats to today's comprehensive line of sustainable plastic plant containers, East Jordan Plastics remains committed to the only industry it has ever served—horticulture.

Committed to quality and sustainable horticultural packaging solutions.

Today, we're a multi-facility manufacturing company that's rooted in sustainability. We've evolved our plastic recycling initiatives with our fully energy-efficient, closed-loop plastic recycling process to create innovative, sustainable, high-quality horticultural containers that meet growers' quality standards and needs.

Made with integrity, right here.

Built on a foundation of hard work, superior customer service, and quality products with competitive pricing, we proudly remain a family-owned and USA-based company. We're committed to using sustainable materials and manufacturing processes to support our industry and the environment.

MOVING FORWARD TOGETHER TO **SERVE OUR INDUSTRY**

At East Jordan Plastics, Inc., we're determined to create sustainable solutions that meet our partners' quality standards. Our vision, mission, values, and pillars reflect this attitude and define what we do, why we do it, and how we do it.

They give everyone on our team the drive, guidance, direction needed to make thoughtful and considered decisions and take actions that align with our business goals.

OUR **VISION**

To be the leader in quality and sustainability of packaging solutions for the horticultural industry.

OUR **MISSION**

Advance our customers by providing them innovative, sustainable, superior horticultural containers.

OUR CORE VALUES

QUALITY & SERVICE

We pay attention to the smallest of details in the manufacturing process and customer service.

INTEGRITY

We will be honest, fair, and ethical in all our business activities, and as accountable to ourselves as we are to our customers.

GRATITUDE

We value and respect our employees and the contributions they make to our customers' success.

SUSTAINABILITY

We are committed to using sustainable materials and manufacturing processes to be good stewards of our communities and the environment.

INNOVATION & DRIVE

We welcome the challenges in our industry to continuously improve sustainable packaging through design, materials, and technology.

OUR PILLARS

SAFETY

- We keep each other safe. No shortcuts, No exceptions!
- We prioritize the safety and well-being of our employees, customers, and environment.
- Safety drives the decisions we make.

EXCELLENCE

- We pursue the highest level of quality in our products, delivery, and customer service.
- We believe in developing our employees to be the best they can be.
- We maximize efficiencies and employ best practices to bring value to our customers.

ACCOUNTABILITY

- We foster a culture of HORT with our employees and customers.
 - Honesty
 - Opportunity
 - Respect
 - Trust
- Being a leader in sustainability is a responsibility we take seriously.

CLOSED-LOOP RECYCLING

HOW OUR PROCESS WORKS

Each step of our streamlined, closed-loop recycling program is essential to the continued success of growers, retailers, and consumers. In addition to achieving Post-Consumer Recycled (PCR) Plastic Certification from AM Testing, our process and dedication to simply doing the right thing has helped us become a leader in sustainable horticultural packaging.

THE SUSTAINABLE CHOICE

NEW CONTAINERS

At our 150,000-square-foot South Haven, Michigan and 260,000-square-foot Lyons, Georgia facilities, we recycle polystyrene, polypropylene, and HDPE containers generated from both greenhouses and retail stores. From these materials, we manufacture new containers at our East Jordan, Beaverton, South Haven, and Lyons facilities.

GREENHOUSE / GROWER

From our manufacturing facilities, containers are delivered to growers, who grow in the containers, then ship products to retailers for consumers to purchase.

RETAIL / CONSUMER

Consumers bring back their used growing containers to participating garden centers. Most participating garden centers have a designated location with signs that instruct consumers where to return containers. When the spaces are full and a grower returns to the store to deliver new plants, they take the full rack back to their greenhouse for sorting and consolidation.

RECLAIM CONTAINERS

Plastic is sorted off the racks into different bins—one sort bin for each plastic container type that comes back to the greenhouse. When a grower has enough material—whether it be a full load or less than a truckload that needs to be moved—we coordinate for our trucks to pick the material up.

REGRIND MATERIAL

On average, more than 35% of the raw material we use in manufacturing is PCR, and 75% of the raw material we use comes from recycled sources. We bring these materials back to our South Haven, MI and Lyons, GA facilities, and turn them into good, clean regrind. After, we manufacture new, sustainably designed containers—made with up to 100% PCR—for redistribution. Then, the process repeats (and repeats).

OUR RECYCLING PROCESS

WHY RECYCLING IS IMPORTANT

With demand for sustainable practices continuing to grow, we're committed to delivering high-quality plastic products through our fully energy-efficient, closed-loop plastic recycling process. Here's why:

- ✓ When recycled, horticultural containers avoid landfills and, instead, return directly to our manufacturing stream.
- ✓ Waste-removal fees are reduced by keeping containers out of dumpsters and landfills.
- ✓ Public sentiment improves and growers are viewed more highly when they use sustainable plastic growing containers.
- ✓ Opportunities for select containers to be reused are created.
- ✓ Foot traffic increases as consumers return their containers to your garden center.
- ✓ New customers are attracted from non-participating retailers.
- ✓ A better sustainable footprint can be achieved due to trash reduction.
- ✓ PCR Certification legitimizes our recycling efforts and shows our commitment to creating sustainable solutions for our partners.

As a member of the Michigan Recycling Coalition, it's our goal to implement sustainable solutions that can leave a lasting impact on their businesses and our industry.

HOW TO GET INVOLVED

Growers can follow this simple process to join in.

SEPARATE MATERIAL BY TYPE

Containers do not need to be cleaned, but do need to be separated by material type. We accept:

Polypropylene (PP): #5

Polystyrene (PS): #6

High-Density Polyethylene (HDPE): #2

PALLETIZE OR BALE MATERIAL

Once separated, material should be palletized or baled. For the most efficient transportation, we recommend:

- Like-containers should be nested together, then strapped or wrapped
- Single pallets should not exceed 90"-100" tall
- Double-stacked pallets should not exceed 48" tall

RETURN TO EAST JORDAN PLASTICS

We work with growers to determine the best process for returning products to our recycling facilities*:

- Pick-Up: We can coordinate pick-ups with deliveries of finished product.
- Delivery: We schedule deliveries of used horticulture containers at our South Haven and Lyons facilities.

*Truckload quantities are ideal for both pick-up and delivery. LTL quantities can also be arranged.

SET YOUR PLANTS APART

Help retailers sell out faster

LABELING AND HIGH IMPACT GRAPHICS

Put your growing pots to work. As a medium for everything from barcodes and plant care instructions to planting tips and landscaping suggestions, our pots can help set your plants apart. Plus, you'll build brand recognition and make your varieties distinctive and stand out among others in the garden center.

COST-EFFECTIVE PROCESS WITH SPECTACULAR RESULTS

Our digital print plate technology—combined with our 8-color print capability—offers you an economical alternative to other forms of high resolution printing and labeling. It's the economical way to get your plants noticed—and sold—faster than ever.

MINIMUM ORDER REQUIRED

Please contact your sales representative for a quote.

PRODUCT COLOR GUIDE

With our guide, you can choose from a variety of stock colors for your pots. It's important to remember that these are approximate colors, and there might be slight variation when produced. Minimum quantities may apply and may be subject to our production run schedule.

SHUTTLE POT® STADIUM® FLOWER POTS

Our innovative and patented line of SHUTTLE POT® STADIUM® plastic grower pots enhances your entire operation—from marketing and production to the actual shipping of the finished product. True round sides enable offset print for custom high end graphics. Combined with flat sides, these plastic grower pots offer easy label application as well as improved presentation and tag insertion. Plus, the squared-off sides deliver a space-saving advantage for growing and shipping densities.

- Experience improved space utilization in greenhouse/field production, on shipping racks, and at retail
 - Automation friendly
 - Flat sides are ideally suited for label application
 - Tag slots oriented for easy insertion
- Containers can be printed on curved sides
 - Features easy dispensing, co-extruded construction, dual level drainage, and easy plant removal
 - All black containers and trays are produced with close to 100% recycled horticultural material

SHUTTLE TRAY® STADIUM® FLOWER TRAYS

Just like our SHUTTLE POT® STADIUM® plastic grower pots, SHUTTLE TRAY® STADIUM® flower trays take your growing operations to the next level. As a part of our revolutionary horticultural solutions, these trays are designed to hold SHUTTLE POT® STADIUM® plastic grower pots in position in one of two ways to give you flexibility while delivering improved space utilization capabilities. You can choose thermoformed fill trays or our unique injection molded trays that allow for better merchandising capabilities.

SHUTTLE POT® FLOWER POTS

Strength, stability and made-in-the-USA quality make the SHUTTLE POT® one of our most popular product lines. Built with sturdy rims and shoulders for quick de-nesting and dispensing, our SHUTTLE POT® flower pots are designed to move more plants faster than ever before.

- Co-extruded pots feature a dark inner layer that prevents light from harming delicate roots.
- Dual-level drain holes and a footed bottom design ensure better drainage.
- Smooth finish makes plant removal a cinch.
- Print (on round and SHUTTLE POT® STADIUM® pots only) and label for improved merchandising and visual appeal.

SHUTTLE TRAY® FLOWER TRAYS

Exclusively offered by East Jordan Plastics, SHUTTLE TRAY® flower trays and pot carriers anchor pots securely during transport from bench to rack to truck. Sturdy and strong, its unique design makes it difficult for soil to fall between the growing pots — making for worry-free shipment. Multi-compartment plant trays facilitate fast display breakdown and setup, as well as improved, better looking spacing for large-canopied crops.

- Fast and easy sales setup
- Encourages multi-pot sales
- Multiple holes ensure adequate drainage

SHUTTLE™ HANGING BASKETS, PLANTERS, BOWLS & INJECTION MOLDED POTS

For quality, American-made, injection-molded plastic hanging baskets, look no further than SHUTTLE™ containers. Functional and attractive, our line of SHUTTLE™ containers are manufactured to meet your needs in a wide variety of options. From baskets and planters to bowls and pots, this fully featured injection molded line of containers offer enhanced strength and stability. They're designed to go the distance for long term use in outdoor environments.

- Tag slots are integrated in the rims of all injected molded items.
- Some hanging baskets have multiple hanging options; over the rim for automation (10" and 11" only), and double clip and wire hanger holes.
- Planters have sturdy construction with heavy rims and sidewalls with bottom slots for use with industry standard saucers.
- Injection molded pots have strong rims that accept both hangers and cages. In combination with the cages, these containers work well for poinsettia, mum and nursery crops that need plant support.
- Injection molded SHUTTLE™ containers that are offered in black or gray are manufactured using up to 100% recycled content.

SHUTTLE™ SQUARES & POT CARRIERS

Like our SHUTTLE POT® Flower Pots, our SHUTTLE™ Squares are designed to withstand whatever the grower world can dish out. With strong rims and sturdy shoulders for quick de-nesting and trouble-free use in automated systems, SHUTTLE™ Squares feature a smooth, seamless finish for easy labeling and to make plant removal a breeze.

INJECTION MOLDED TRAYS

Our injection molded trays are designed and manufactured for use on automated destacking, filling, transplanting, and transport equipment. Made from up to 100% recycled horticultural containers, our injection molded trays are strong enough to be reused until they're ready to be recycled again (and again).

FLATS & INSERTS

A-SERIES FLATS (10 7/8" x 21 1/4")

Featuring our largest footprint flat and insert system (measuring 10 7/8" x 21 1/4"), the A-Series of products are ready to meet any planting requirement and deliver greater efficiency and yield. All A-Series inserts have a variety of compatible A-Series flats.

- Instant two-finger de-nesting, insert after insert.
- Consistent cell thickness, producing uniform strength throughout the entire insert and preventing a paper-thin bottom.
- Easy pack separation thanks to our precise trimming process.
- Uniform holes and channels for complete and even drainage of cells.

L-SERIES FLATS (7 ½" x 20")

Featuring a 7 ½" x 20" footprint, the L-Series is an excellent way to save space while still accepting an adhesive label. Plus, the high center rib in L-Series flats improves stacking strength, and all L-Series inserts are compatible with a variety of L-Series flats.

P-SERIES FLATS & INSERTS (13" x 16 ¼")

Featuring a 13" x 16 ¼" footprint, the P-Series was designed as a labor saving solution for both growers and end users. With no single pots to worry about, you can quickly drop the P-Series into our PF20-EC-BLK tray for filling. Available in two depths to choose from, it's ideal for both landscaping and groundcover solutions.

S-SERIES FLATS (8 ½" x 20")

Built with an 8 ½" x 20" footprint, the S-Series features flats that have matching full-height support ribs to withstand the rigors of automation from transplanting to shipping. Another advantage of the S-Series is the ease of labeling to price and identify your crop. All S-Series inserts have a variety of compatible S-Series flats.

T-SERIES FLATS (10" x 20")

Known as "true" flats and inserts, the T-Series utilizes a space-saving 10" x 20" footprint. Because T-Series inserts are a full $\frac{3}{8}$ " deeper, they hold virtually the same soil volume as the A-Series while enabling more flats per bench, cart, truck, or retail facing environment. They're both effective and space saving, plus all T-Series inserts have a variety of compatible T-Series flats.

PLUG & PROPAGATION TRAYS

Our plug and propagation trays are precision-engineered to exact tolerances. Whether you need to hand-stick rooted cuttings or sow millions of seeds using the latest automated equipment, our plug and propagation trays deliver the levels of consistent precision and repeatable performance you need.

- Include round, square, hexagonal, and octagonal cells, vented and non-vented designs.
- Have uniform wall thickness that provides strong corners and bottoms.
- Designed for easy de-nesting.
- Include common element (CE), endless-thermoformed, vented or non-vented, precision punched, precision trimmed, and soil saver version features.
